Environment/Configuration Management  
Dashboards  
Training

## DASHBOARDS

### Overview

Olenick & Associates provides software testing, quality assurance, project management, and IT service management consulting services to ensure the success and quality of client's projects, applications, processes, and infrastructure.

### Service Highlight: Dashboards

The Olenick & Associates Dashboard is a robust, inexpensive, and easy to implement alternative for companies seeking the benefits of a highly visible measurement program without having to invest, customize and train employees to support proprietary dashboard technology. The following diagram shows the O&A delivery methods, competencies, and service offerings with a focus on **Dashboards**:

O&A's created this simple and effective measurement approach utilizing past project management, software testing and information technology experience. O&A has successfully implemented the O&A Dashboard at several large clients.

## DASHBOARDS

### O&A Dashboard Features

- Standard Project Metric Graphs
- Easy to use Web-based Graphical User Interface
- Secure Access
- Hierarchical Metric Rollups
- Integration to Workflow Management Software (TestDirector, ClearQuest, PVCS Tracker)
- No Annual Licensing Costs
- Ease of Maintenance
- Customizable to each environment
- Standard Technologies (Desktop, Web Server, Database Applications)

### Implementing the O&A Dashboard for Project Success

The O&A Dashboard uses standard technologies (desktop web server and database applications) to deliver metrics to project stakeholders and team members in a simple to use web browser. The O&A Dashboard is simple to install and customize. The O&A Dashboard is perfect for project-based implementations and can be scaled up to the program, department or enterprise level.

The standard productivity, schedule and quality graphs establish a clear representation of the status of your projects. The flexibility of the metrics dashboard allows views to be created to display critical information quickly.

### Metrics Dashboard Case Studies

**Dashboard Client Example:** Our client used the O&A Metrics Dashboard to produce weekly reports for project team progress, productivity and quality levels for their legacy system replacement program. The O&A Dashboard interfaces with **HP / Mercury Interactive Quality Center**, which is used for project issue and defect management.
